

Stainless Steel 316L

Physical Properties

| | |
|------------------|-----------------------|
| Particle Size | 15 - 53 μ m |
| Form | Spherical |
| Liquidity | 40 S |
| Apparent Density | 3.9 g/cm ³ |

Molded Part Performance

| | |
|--------------------|----------------|
| Density | \geq 99% |
| Tensile Strength | \geq 560 MPa |
| The Yield Strength | \geq 480 MPa |
